DETAILED ACTION

Claim Rejections - 35 USC § 112

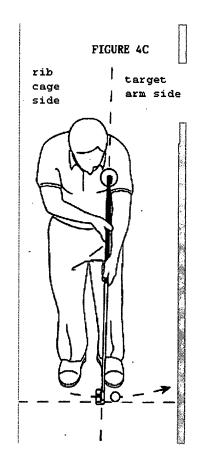

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7, 10-19, 22-29, 35 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 13, the added limitation that the "shaft is not positioned between the target side arm and the player's rib cage" is inapt because it is inconsistent with applicant's originally filed drawings. See applicant's own Figure 4C below where the shaft is clearly positioned along the dashed line between the target arm side and the player's rib cage side.

Art Unit: 3711

Further, the claims also require that the shaft be positioned "against the player's armpit or area at the front of shoulder of the arm of the target side hand" (second sub-paragraph). As the armpit is the area beneath the shoulder and the shoulder is a part of the body between the rib cage and the arm, the armpit is necessarily between the arm and rib cage. Therefore, the shaft cannot be positioned against the armpit and meet applicant's added limitation.

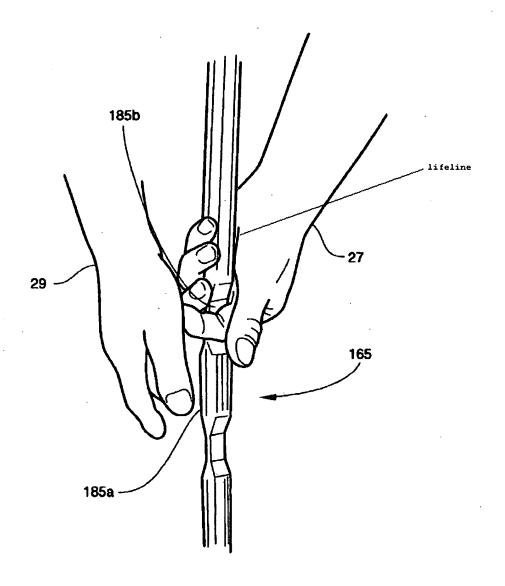

Claims 2-7, 10-12, 14-19, 22-29, 35 and 36 are rejected because they depend either from a rejected claim 1 or claim 13.

Claim Rejections - 35 USC § 103

- 3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 4. Claims 30 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shioda (USPAPN 2004/0166956) for the reasons set forth in the previous Office action.

Regarding claim 30, Figures 14-23 show the recited grips by the target side hand and the other hand. As Figure 14 clearly shows the golf club positioned between the user's index and middle fingers but fails to definitively show whether the club travels along the "lifeline" of the palm or across the "pinkie pad", it would have been obvious to one of ordinary skill in the art to hold the club in either position which would be most comfortable for the user.

Art Unit: 3711

It is believed that Figure 14 of Shioda shows the golf club shaft entering the user's palm along the "lifeline" as shown by the thumb crease above. It is also believed that the shaft would have to enter the user's palm along the "lifeline" to reproduce the stance shown in Shioda's Figure 1. To the extent that Shioda does not explicitly describe where the shaft enters the user's palm, Shioda does clearly state that his grip "allows

Art Unit: 3711

the golfer's wrists to remain aligned with the hands" to provide a more controlled grip and golf club swing. See paragraph [0006]. Further, Figure 14 clearly shows the shaft exiting the target side hand between the index finger and third finger of the target side hand as claimed and there is a limited range of possible entering positions that the shaft could have in order to maintain that exit orientation. As it was commonly known to those skilled in the golfing art that users position their hands for a comfortable grip, it would have been obvious for a person having ordinary skill in the art to adjust the position of the shaft, including along the "lifeline" of the user's palm, in order to obtain the most comfortable grip while also maintaining the correct wrist alignment.

Regarding claim 32, Figures 20-21 show the target side hand below the other hand.

Regarding claim 33, Figures 6-12 appear to show a putter.

Regarding claim 34, as Shioda discloses his grip does not create additional tension in the golfer's arm, thereby preventing extraneous motion, one of ordinary skill would realize that such a benefit would apply to all golf strokes, including chipping.

5. Claims 1, 10-13, 22-29, 35 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over the London Evening

Standard article cited by applicant (Rock Steady) for the reasons set forth in the previous Office action.

Regarding claims 1, 10-13, 22-29, 35 and 36, Rock Steady discloses the method of holding the top of the golf club between the player's armpit. Although the article and the accompanying photograph fail to explicitly describe the exact position of the user's arms, it is noted that a gripping portion exists approximately halfway down the club shaft. As such, it would have been obvious to a person having ordinary skill in the golfing art to fully extend his arm along the shaft to grab the gripping portion of the club in order to putt the ball. The conclusion of obviousness may be made from common knowledge and common sense of the person of ordinary skill in the art.

Regarding the amendment to claims 1 and 13, Rock Steady is considered to meet those limitations to the extent that the Rock Steady photograph shows the same positioning as applicant's Figures.

Response to Arguments

6. Applicant's arguments filed 05 September 2006 have been fully considered but they are not persuasive for the reasons set forth above.

Art Unit: 3711

Further, no specific arguments have been directed against the rejection of the claims with respect to Rock Steady.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raleigh Chiu whose telephone number is (571) 272-4408. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eugene Kim, can be reached on (571) 272-4463.

The fax number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
